

Silver Works

Wedding Rings Workshop

Your rings, your way

The Workshop

Since 2019, we've been assisting couples in crafting their personalised wedding rings through hands-on experiences. Our skilled jewellers will expertly guide you through each step of the process at our workshop located in the heart of Dublin City Centre.

Participation in the 4-hour
Wedding Rings Workshop is priced at €365 per
couple, encompassing the use of Sterling Silver
in any of our bespoke designs. This fee
excludes additional gold or platinum, as well as
services like stone setting, engraving, and
plating.

Your rings, your way

Consider what you would like your wedding rings to be. Everyone is different so whether you choose to keep it classic or you want to add some personality and customisations, there is something for everyone

Classic Wedding Rings

The classic shape wedding ring epitomizes timeless love with its simple, smooth design. Crafted with precision, its unadorned surface symbolizes the purity of a lifelong commitment. The ring's seamless, polished form signifies an enduring bond, transcending trends. This understated piece of jewellery speaks volumes about love's timeless nature, embodying the unbroken circle of marriage and the enduring commitment shared between partners.

Textured Wedding Rings

The forged textured wedding ring is a unique symbol of commitment, crafted with artisanal skill. Its intricately textured surface mirrors the nuanced path of marriage, embodying the couple's shared journey. Unlike smooth designs, this ring celebrates individuality, serving as a tangible representation of lasting partnership a testament to the beauty found in the twists and turns of a shared life.

Shaped Wedding Rings

Discover the perfect complement to your love story with our collection of shaped wedding bands. These uniquely crafted rings are designed to fit alongside engagement rings of various shapes and styles, creating a harmonious and personalized union. Whether you prefer a contoured band to embrace a solitaire diamond or a gracefully curved design to enhance the elegance of your engagement ring, our shaped wedding bands offer a touch of individuality to symbolize your distinctive bond. Explore our diverse selection to find the ideal shape that resonates with your love and adds a special touch to your forever commitment.

Your Rings

Recycle your gold

Crafting your sentimental wedding rings using heirloom jewellery is a meaningful way to symbolize your union.

Prices start from €150 to melt and roll down your metal.

Steps for recycling your heirloom jewellery;

Select the desired width for your rings. Submit your existing jewellery for evaluation by one of our jewellers at least three weeks before your scheduled workshop. Our goldsmiths will assess your metals, examine hallmarks, determine the required weight for your rings, and identify recyclable materials. The Wedding Rings Workshop manager will reach out to you with the assessment results.

Extra charges may apply if your metal requires stone removal, plating removal, extra gold for the rings, or if you opt for a higher alloy, such as converting 9K gold to 18K gold.

Please be aware that if you have white gold, we will require additional gold to facilitate the bonding of the metals. Avoid bringing chains, as they contain excessive solder, posing a risk of cracks in the metal during the rolling process.

FAQ

Recycle your gold

Q. Can I use my old gold for our wedding rings?

A. Yes, please drop your gold into us for assessment.

Q. How much does it cost?

A. It costs €150 for the melt and roll. There may be extra charges if your old jewellery has any plating or stones.

Q. What is assessed exactly?

A. During the metal assessment our goldsmith checks the karat, weighs and calculates how much metal will be needed for your rings.

Q. How long does the assessment take?

A. 3 - 4 working days.

Q. When should I bring my old jewellery for assessment?

A. At least 3 weeks before your workshop date.

Q. Can my old chains be used for recycling?

A. Unfortunately, chains are not suitable for the melt and roll process due to too much solder in the metal resulting in cracks in the final result.

Q. Can I use my old white gold?

A. Yes but we will need to add fresh 24K gold which incurs an extra charge depending on the weight.

Q. I am not sure what Karat my metal is, can you test it?

A. Yes, we have the facilities to test your metal.

Q. How much metal do I need for a 2mm 18K yellow gold ring?

A. Approximately 5g

Q. How much metal do I need for a 2mm 9K yellow gold ring?

A. Approximately 3g
