## The Workshop

Since 2019, we've been assisting couples in crafting their personalised wedding rings through hands-on experiences. Our skilled jewellers will expertly guide you through each step of the process at our workshop located in the heart of Dublin City Centre.

Participation in the 4-hour Wedding Rings Workshop is priced at €370 per couple, encompassing the use of Sterling Silver in any of our bespoke designs. This fee excludes additional gold or platinum, as well as services like stone setting, engraving, and plating.

## Your rings, your way

Consider what you would like your wedding rings to be. Everyone is different so whether you choose to keep it classic or you want to add some personality and customisations, there is something for everyone

# Your Rings

# Remodeling

Crafting your sentimental wedding rings using heirloom jewellery is a meaningful way to symbolize your union.

Prices start from €150 (1 ring) and €250 (2 rings) to melt and roll down your metal.

Steps for recycling your heirloom jewellery.

1. Check for metal karat (hallmark located on piece) 9K 375. 14K 585. 18K 750.
2. Weigh your jewellery in grams using a small digital scale.
3. Choose how wide you want your ring/rings, 2mm - 6mm.
4. Check your ring size. You can come in to our store on Drury Street to check your size.
5. Get in touch with us with this information and we can check if you have enough metal for your rings.

Extra Charges

1. Extra charges may apply if your metal requires stone removal, plating removal, extra gold for the rings, or if you opt for a higher alloy, such as converting 9K gold to 18K gold.

Things to avoid

1. Avoid using chains, as they contain excessive solder, which can crack the metal during the rolling process.

# FAQ

## Recycle your gold

### Q. Can I use my old gold for our wedding rings?

A. Yes, you can check at home or please drop your gold into 24 Drury Street for assessment.

### Q. How much does it cost?

A. 1 ring costs €150 and 2 rings is €250. There may be extra charges if your old jewellery has any plating or stones.

### Q. What is assessed exactly?

A. During the metal assessment our goldsmith checks the karat, weighs and calculates how much metal will be needed for your rings.

### Q. How long does the assessment take?

A. 3 - 4 working days.

### Q. When should I bring my old jewellery for assessment?

A. At least 3 weeks before your workshop date.

### Q. Can my old chains be used for recycling?

A. Unfortunately, chains are not suitable for the melt and roll process due to too much solder in the metal resulting in cracks in the final result.

### Q. Can I use my old white gold?

A. Yes but we will need to add fresh 24K gold which incurs an extra charge depending on the weight.

### Q. I am not sure what Karat my metal is, can you test it?

A. Yes, we have the facilities to test your metal.

### Q. How much metal do I need for a 2mm 18K yellow gold ring?

A. Approximately 5g

### Q. How much metal do I need for a 2mm 9K yellow gold ring?

A. Approximately 3g
